

CHILLIWACK DANCE SCHOOL COMMUNICABLE DISEASES PROTOCOLS

JULY 3, 2021 UPDATE

ZOOM AVAILABLE

1. Classes will continue to be available via Zoom for anyone who prefers to stay home. Let us know.

ILLNESS POLICY

2. Please check your dancer for symptoms while at home and stay home if you are sick. Attend by joining Zoom.
3. If the instructor is ill, either there will be a substitute teacher, or the class will be held via Zoom, or both (substitute runs class; regular teacher attends via Zoom).
4. If someone becomes ill during class, they must immediately leave. Parents will be called, the student must wait in a separate area, and all applicable spaces and surfaces will be sanitized.

HAND HYGIENE

5. Wash hands or sanitize before entering the studio. You may use the bathroom.
6. Cough or sneeze into your elbow, not your hands.
7. In case any germs are picked up while in the studio, everyone should wash/sanitize hands again when leaving.

REDUCED NUMBERS AND REDUCED PHYSICAL CONTACT

8. To reduce the general head count and the number of people inside the studio, we ask that only dancers enter, unless a parent is needed for any reason (young kids need mom, anxiety, need to speak to teacher, etc.). Please no extra family members unless you have no other choice.
9. If a parent is needed, please only ONE parent per student.
10. Parents who do not need to be in the studio should either wait in their cars, drop-off and then pick up, or hang out outside with other parents.
11. Toys in the lobby are not available. We do not encourage siblings hanging out indoors.
12. If you are able to pay by electronic means, such as e-transfer or online, please do. This will reduce contact with front desk staff.
13. Please show up right before your class, unless there is no other choice and you must drop off early.

PHYSICAL DISTANCING

14. Physical distancing is no longer required in class, as of Step 3, which came into effect July 1, 2021.

SANITIZING

15. We will maintain a clean environment and sanitize frequently touched surfaces and equipment.

BARRIERS/MASKS

16. Face coverings are no longer required, but we request that spectators continue to wear them for now.
17. Barriers remain in place at our registration desk.

VENTILATION

18. To increase ventilation and air flow, windows and doors to the studio may be opened, and/or the large bay door downstairs may be opened. The exhaust fan in the studio will be used regularly to create air changes.

CONTACT TRACING

19. We will keep attendance records to aid contact tracing if the need arises.
20. If anyone in your family develops COVID-19, let us know right away!
21. Daily health screening checklists are no longer required.
